Inference Activities

by David Newman BAppSc (Speech-Language Pathology)

Thank you for taking the time to look at the Inference Activities program. All of the activities have been tested on many of my students over a long period of time.

The questions and activities in the program have been designed to be as user friendly. The activities will assist your students to sharpen and improve their inference and thinking skills.

I have included a full table of contents and thumbnails of some of the exercises and activities included in the program to give you a sense of the look and feel of the activities.
# Table of Contents

What is Inference? ................................................................................................................. 5
What’s in the Inference Activities Book? ........................................................................... 7
Using the Inference Activities Book ................................................................................ 8
Chapter 1 (Inference from Pictures and Text) .............................................................. 9
Chapter 2 (Sentence Level Inference) ............................................................................ 20
*Concept:* Location........................................................................................................ 20
*Concept:* Time................................................................................................................ 23
*Concept:* What.............................................................................................................. 26
*Concept:* Who................................................................................................................ 29
*Concept:* Why............................................................................................................... 32
Chapter 3 (Paragraph Level Inference) History ........................................................... 35
Chapter 4 (Paragraph Level Inference) Weather ......................................................... 41
Chapter 5 (Paragraph Level Inference) Plants .............................................................. 46
Chapter 6 (Paragraph Level Inference) Solar System .................................................. 51
Chapter 7 (Paragraph Level Inference) Animal Kingdom ........................................... 65
Chapter 8 (Paragraph Level Inference) Science Fiction & Fantasy .............................. 61
Chapter 9 (Paragraph Level Inference) Myths and Legends ....................................... 68
Chapter 10 (Paragraph Level Inference) Adventure .................................................... 73
Chapter 11 (Paragraph Level Inference) Whimsy ........................................................ 78
Chapter 12 (Paragraph Level Inference) Kids Stuff ................................................... 83
Chapter 13 (Text Level Inference) ................................................................................. 88
*Story:* The Witches of Carpathia ............................................................................... 90
Appendix – Answers Section ......................................................................................... 93

Feel free to print out the bonus inference activities from the inference activities book below…
Inference from Pictures and Text

‘I got the shock of my life when the train left the tracks and became airborne.’

a. Why did the character get the shock of his life?
   Answer: ________________________________

b. Is this scenario science fiction or real life? How do you know that?
   Answer: ________________________________

c. Why don’t trains have wings?
   Answer: ________________________________
Sentence Level Inference

Concept: What
What refers to what is happening or has happened, and what someone is or is doing.

Example: On the vessel’s highest mast was a black flag with white skull and crossbones.

Question: What type of vessel is being described?

Answer: An old pirate ship

Critical Information: Highest mast, skull and crossbones.

Inference Exercises: What

One: The captain
The captain announced over the intercom that all passengers needed to fasten their seatbelts and prepare for landing.

Question: What type of transport were the passengers on?

Two: The riders
As Peter glanced over his shoulder at the other riders, his foot slipped off one of the pedals and he nearly toppled over.

Question: What nearly toppled over?
Paragraph Level, Non-Fiction - *Weather*

**One: Temperature**

A thermometer measures the warmth of the air. The most comfortable temperature for people to live in is usually 20-25 degrees Celsius, or 68-77 degrees Fahrenheit. When the temperature drops below 20 degrees Celsius it is more likely that people will wear more clothes. At temperatures above 25 degrees, people will like to be near water.

**Question 1:** Why do you think people would wear more clothes when the temperature is below 20 degrees Celsius?

**Question 2:** Why would people want to be near water at temperatures above 25 degrees Celsius?

**Two: Fog**

Fog can be very difficult to see through. Fog is made up of millions of tiny droplets of water that absorb sound, and make vision quite difficult. If heavy fog occurs on a busy freeway, drivers have to slow down. Driving a car quickly through dense fog will soon lead to accidents.

**Question 1:** Would it be easy to hear clearly in a dense fog?

**Question 2:** Why would driving a car quickly through thick fog be dangerous?
Paragraph Level - Animal Kingdom

One: The Bar-Tailed Godwit

The Bar-Tailed Godwit is a type of wading bird that is famous for making the longest non-stop migration. Each year the Godwit migrates from the cold state of Alaska all the way down south to New Zealand, a distance of over 11000 kilometres. The Godwit spends the winter in the more temperate environment offered by countries such as New Zealand.

Question 1: Why might the Godwit migrate to the temperate regions of New Zealand at winter time?

Question 2: Does the Godwit stop to rest during its long flight?

Two: The Colossal Squid

The Colossal Squid is one of the rarest animals known to man. The squid is famous for its huge size, hence the name colossal. The animal is about 13 meters long. If the squid were to be carved into calamari, the rings would be as big as tractor tires. This deep sea monster is has the largest eyes in the animal kingdom, as big as dinner plates.

Question 1: Have there been many Colossal Squids captured?

Question 2: Would the Colossal Squid have good eyesight?
One: Top of the mast

The captain ordered me to the top of the mast. The main sail needed to be secured. The wind howled and its sharp fingers scratched at my shirt, making it ripple fiercely. The waves pounded against the ship’s wooden beams. Each wave thrust the ship to the side and the main mast shivered, nearly tossing me down into the violent swell of the ocean. I hung onto the mast for dear life, determined to do my job.

Question 1: What was the weather like? How do you know that?

Question 2: Is the character frightened? How do you know that?

Two: Old Boxy

The whole family from the homestead hurried over to see me ride Old Boxy. Everyone was here to watch the show. I carefully placed my left boot in the stirrup, lifted up and swung into the saddle. My heart beat so hard I thought I might faint. The brute stood motionless as I kicked with my heels. Then, with a malicious launch, the creature’s back legs thrust out, and I was airborne and soon lying face first in the mud.

Question 1: What is Old Boxy? How do you know that?

Question 2: Is Old Boxy well known for being difficult to ride?
