Game Instructions

# Sentence Builder Racetrack

## Instructions

**Players:** 2 -4

**Age:** 6 and up

**Contents:** Racing Track Game Board

4 Top End View Motorbikes (*Yellow, Green, Red, Blue*)

**What you will need...**

2 dice

### Sequence

- Each player rolls a dice to see who has first turn. The highest dice roll goes first, the next highest goes second, etc.
- Place motorbikes on chequered space pointing in a *clockwise* direction, i.e. pointing *west* . 

- The game board race track has a sequence of spaces which have white lines painted on. These are the racetrack *straights*. The *straights* are designed for speed. To represent this, for each space that the white lines feature, the player can roll *two dice*. This is to reflect the high speeds that the superbikes can reach on the flat *straights*.
- Once players reach the chicane and curved tracks, they are to roll *one dice*. The one dice represents the slower speed and caution each player must display to navigate the tricky chicane and curved track safely.
- Each player on their first turn will start with 2 dice because they will automatically begin the game thundering down the initial straight.
- Other colours are represented on the game board. They are as follows...

**Red:** lose a turn. The player loses control of the bike on a sharp bend.

**Green:** reroll the dice (*free turn*). The player skilfully navigates a tricky curve.

**Orange** indicates free turbo reroll (*two dice on free turn*).

- The first player to reach the chequered space wins the game. For variety, players can opt to begin the game pointed in an *anti-*

*clockwise* direction, facing east. An alternative is that half the players can travel in a *clockwise* direction, and the other half travel in an *anti-clockwise* direction. As before, the first player to reach the chequered space wins the game.

## Playing pieces...

Photocopy and cut out the playing pieces and attach to card or laminate for extra durability. There are **two sizes** to choose from. Attach thick cardboard or wood under each motorbike to provide a nice separation from the game board.
